

Preventing Falls at Home: Safety Tips for Seniors in Chennai

Full article URL: <https://www.Nhlcare.com/elder-care/fall-prevention>

Why Preventing Falls Matters

- Falls are the leading cause of fractures and disability among seniors.
- Even one fall can lead to long hospital stays, loss of confidence, and reduced mobility.
- A safe home environment means less risk, fewer hospital visits, and better quality of life.

Practical Home Safety Tips

- Clear pathways – remove loose rugs, cords, and clutter from floors.
- Install grab bars & railings – Bathrooms, stairways, and near beds.
- Improve lighting – Add bright bulbs and night lights in halls and bathrooms.
- Choose non-slip footwear – Avoid smooth socks or slippery sandals.
- Arrange stable furniture – Secure chairs and keep essentials within reach.
- Exercise for balance – Light physiotherapy or guided balance training reduces risk.
- Keep emergency contacts handy – Post numbers near phones and in mobile phones.

Who Needs Fall Prevention

- Seniors with mobility or balance issues.
- Anyone who has had a previous fall or hip fracture.
- Older adults with stroke, diabetes, or heart conditions.
- Seniors on medications that cause dizziness.
- Elders living alone or far from immediate help.

How Narpavi Homecare Supports Fall Safety

- Home safety assessments to spot risks before accidents happen.
- Trained caregivers for safe transfers and daily mobility support.
- Physiotherapy at home to rebuild balance and strength.
- 24×7 emergency readiness if a fall occurs.
