

Emergency Preparedness Guide for Home ICU Patients

Be Ready for Any Change in Condition — Jupiter Homecare Chennai

Even with expert care, emergencies can happen. A clear plan keeps your loved one safe and gives families peace of mind.

1. Understand Equipment Alarms

- **Ventilator:** high/low pressure, apnea alerts.
- **Monitor:** heart rate, oxygen, BP limits.
- Ask your nurse to explain each alarm and response steps.

2. Rapid Response Plan

- **Step 1:** Notify the on-duty nurse immediately.
- **Step 2:** Nurse escalates to **tele-ICU / doctor**.
- **Step 3:** If advised, activate ambulance (pre-arranged).

3. Essential Contacts Board

Keep a laminated card near the bed with:

- Doctor & intensivist number
- Jupiter 24/7 emergency line
- Ambulance service (pre-booked)
- Closest hospital ICU

4. Backup Power & Oxygen

- Ensure UPS/inverter and generator readiness.
- Keep **spare oxygen cylinder/concentrator** available.
- Check supply levels daily.

5. Family Go-Bag

- Patient medical files & discharge summary
- Insurance card & ID
- Essential medications
- Change of clothes & hygiene kit

6. Regular Drills

- Practice who calls whom.

- Ensure clear exit paths for stretcher.
- Review alarm meanings monthly.
