

Colostomy & Stoma Care Survival Guide — Chennai Edition

Living With a Stoma — Why Expert Care Matters

A **colostomy, ileostomy, or urostomy** lets the body safely eliminate waste after surgery or chronic bowel conditions. But poor stoma care can lead to **skin irritation, leakage, infection, odour, and reduced quality of life**.

With the right routine and support, patients can live comfortably and confidently at home.

Supplies Checklist

- Stoma pouches / bags (one-piece or two-piece as prescribed)
- Skin barrier rings / protective wipes
- Scissors for cutting flange (if needed)
- Stoma powder / paste for sealing
- Disposal bags for used appliances
- Gloves & hand sanitiser
- Clean gauze and warm water for cleansing

Tip: Keep a **travel kit** ready for emergencies when going out.

Daily Stoma Care Routine

1. **Hand Hygiene First** — Wash hands or use sanitiser before and after care.
2. **Empty Bag at 1/3 Full** — Prevents leaks and skin pulling.
3. **Remove Appliance Gently** — Support skin while peeling to avoid trauma.
4. **Clean Skin With Warm Water** — Avoid harsh soaps or alcohol wipes.
5. **Dry Thoroughly** — Moisture can cause poor adhesion.
6. **Inspect Stoma & Skin** — Look for redness, rash, bleeding or unusual changes.
7. **Apply Skin Barrier & New Appliance** — Cut to correct size to avoid leaks.
8. **Secure Properly** — Check fit and adhesion before dressing.
9. **Track Output** — Volume, consistency, and unusual odour can signal issues.

Warning Signs — When to Call for Help

- Persistent **redness, rash, or skin breakdown**
- Foul odour, pus, or unusual discharge

- Stoma turning **black, pale, or very swollen**
- Leakage despite proper fitting
- Sudden severe abdominal pain or fever

Contact **Narpavi Homecare 9790016097** or your surgeon immediately if you notice any of these.

Lifestyle & Comfort Tips

- Wear loose, breathable clothing.
- Empty bag before exercise or sleep.
- Stay hydrated; follow dietician advice on fibre and gas-forming foods.
- Carry spare supplies when travelling.
- Join a stoma support group for confidence and tips.

Why Choose Professional Stoma Care

Narpavi Homecare's stoma-trained nurses:

- Provide **appliance sizing & leakage prevention**.
- Maintain **peristomal skin health** and infection control.
- Teach **caregivers** how to change and empty bags safely.
- Offer **daily logs & WhatsApp updates** — ideal for **NRI families**.
- Ensure **24×7 escalation & rapid hospital referral** if problems arise.
